

The First Officer Fast-Track Program

Langa Air has partnered with commercial air charter/cargo operators and has structured a program designed to build real-world, high-quality multi-engine experience.

The program, "The First Officer Fast-Track", is an opportunity to drastically reduce the normal amount of time it takes to become employable in corporate or commercial flight.

After successfully completing an accelerated introductory training regimen, the First Officer Candidate will be put on-line as a First Officer and will begin building their flight time. Langa Air has established several choices of multi-engine aircraft, including turbine powered.

**Considering the type of aircraft and amount of experience to be gained, the required investment is considerably lower than would be expected.
(Not considering the initial ground training, hourly charges are in the \$20 to \$30 / hour range.)**

Once initial training is completed and minimum flight levels are reached, the First Officer Candidate will be entitled to preferential hiring by the commercial operator, as positions become available.

Financing is available. Ask a representative for details.
